

# special projects

## Project description

EMCOR UK converted existing space into a new employee training room for the offices of a high-profile industrial manufacturing and engineering company. The project involved extensive electrical work, new furniture installation, and the installation of a new glass panel and door, as well as various other refurbishments.

## Key benefits

- Upgraded electrics to help customer's essential equipment function better.
- Installed new, state-of-the-art underfloor busbar and desk power and desk power system, designed to meet customer's specific needs while also providing flexibility.
- Future-proofing services to help extend building lifespan and minimise wear and tear.
- Removed existing internal partitions and installed new glass partition and door, which helped to better utilise existing space.
- New furniture installation, helping to modernize office and boost employee satisfaction.
